### **DETAILED ACTION**

Claims 1-8 are pending.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, in part, and 2, drawn to an in vitro method for identifying modulators of the PAK5 kinase of SEQ ID NO: 30, classified in class 435, subclass 194.
- II. Claims 1, in part, 3 and 8, drawn to an in vitro method for identifying modulators of the PAK5 kinase of SEQ ID NO: 103, classified in class 435, subclass 194.
- III. Claims 4, in part, and 5, drawn to a cellular method for identifying modulators of the PAK5 kinase of SEQ ID NO: 30, classified in class 435, subclass 15.
- IV. Claims 4, in part, and 6, drawn to a cellular method for identifying modulators of the PAK5 kinase of SEQ ID NO: 103, drawn to 435, classified in class 435, subclass 15.
- V. Claim 7, in part, drawn to a method for detecting an agonist or antagonist of a PAK5 kinase, classified in class 435, subclass 15.
- VI. Claim 7, in part, drawn to a method for detecting a binding partner of a PAK5 kinase, classified in class 435, subclass 194.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Also, product and process inventions are distinct if any of the following can be shown: (1) that the process as claimed can be used to make another and materially different product, (2) that the product claimed can be used in a materially different

Art Unit: 1656

process of using that product, or (3) that the product claimed can be made by another and materially different process (MPEP § 806.05(h)). These inventions are different or distinct for the following reasons.

Inventions I-VI are independent because the methods of Inventions I-VI comprise different steps, utilize different products and/or produce different results.

Since the Inventions I-VI comprise different steps, utilize different products and/or produce different results, a search for all of Inventions I-VI, or a subset thereof, would be a burden on the Office.

These inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, as shown by their different classification. Furthermore, as explained above, searching more than one invention would be a burden on the Office. Therefore, restriction for examination purposes, as indicated, is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
